

TRAP TURNER

MUSTANG
EQUIPMENT

Made specifically for semi-trailers, the Trap Turner puts the power in your hands. It takes the hard labor out of manually cranking traps. Unload trucks faster, easier and safer than ever before. The unit features forward/reverse operation and a "soft start" trigger to ensure a gradual, safe reaction. The output turns independently from the handle with no torque transmitted back to the user. The unit itself is quiet and non-impacting.

- Adapters for various trailers
- 74 to 350 ft-lbs torque
- Pneumatic drive
- Light Weight
- Quiet
- Non Impacting

The Trap Turner is supplied complete with custom reaction arm, multi-position stabilization handle, 15ft industrial air hose, filter/regulator/lubricator, fittings to operate the most common trap styles and a 2-year warranty.

Take advantage of our free 30-day trial program and see for yourself.
